FTH CAMP PHILOSOPHY

The therapist at FTH feel this therapeutic camp environment is an important step in your child's transition to the successful inclusion into regular day camp and school programs.

It give the therapist a chance to work with your child in a limited peer interaction setting, as well as individually, over an extended period of time. We can analyze arousal levels, sensory processing needs for a sensory diet, social interactions and functional communication skills while incorporating individual therapy goals into the framework.

Our hope is to provide a fun and motivating camp experience in a safe, supportive environment in order for your child to try out new skills.
